## STAIRCASE MEASUREMENT FOR METAL BALUSTRADE

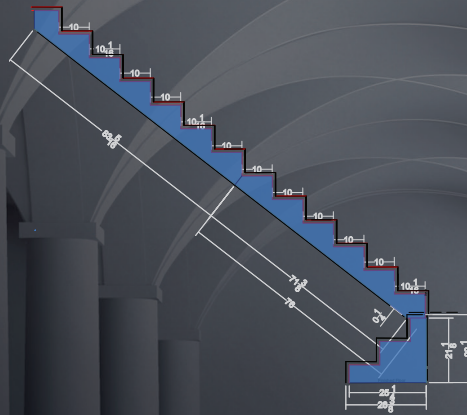

Technician:  
Jordan Mann  
Flexijet North America

Accuracy and efficiency come together with Flexijet 3D!

In this project, traditional site-measurements just weren't getting it right.

Flexijet was able to efficiently measure the details for this balustrade, and the measurement drawing was created in real-time.

This means verification of measurements in the same trip - no return visits needed!

Time with Flexijet: 1 hr

Without Flexijet: 8hrs

Time Saved: 7 hrs
