## FULL-HEIGHT BACKSPLASH, PLUG CUTOUTS, AND WATERFALLS

Waterfall legs, full-height backsplash and backsplash with plug cutouts? No problem to measure in 1 trip with Flexijet.

Flexijet's Next-Generation technology means accurate measurements of multiple planes in fewer trips.

Flexijet's motorized laser can point directly back at a point, allowing for the easy visual verification of sink centres, corners, and any point of geometry.

Our powerful FlexiCAD and Flexijet Stone software lets you measure in 2D and see multiple surfaces come together in 3D, so multiple surfaces can come together ahead of time, resulting in smoother installations!
